## What is a bike corral?

A bike corral converts the space of one car parking stall to parking for 10 bikes. It's a great use of space and a low cost option for more customer parking, it frees up sidewalk space for pedestrian foot traffic and communicates a commitment to bike friendliness.

*The Hopleaf Brewery is located in one of Chicago's most bike focused neighborhoods. Many patrons arrive via bike throughout the year. Turning a loading zone into bike parking for 12 bikes has provided a boost for business at the brewery and has added to the streetscape of the neighborhood.*

*The Andersonville bike corral is part of a parklet designed as part of Chicago's People Spot program. Custom logo plates promote Andersonville's bike friendliness.*
